

THERMOPLASTIC-ON-GLASS

Carmakers from around the globe fit their vehicles with our Thermoplastic On Glass solution, which complements the glass run channel to perfectly seal the window. Its patented two-part division post allows easy assembly of hidden frame glass run channels: with the snap-fit locking of the outer division bar, installation is a breeze. As opposed to most solutions that are two or three separate components, our Glass Encapsulation solution is a single part, incorporating glass, weatherstrips and a division bar. In addition to being lightweight, they guarantee a high level of acoustic insulation and a watertight sealing.

- Products Family: **Glass Encapsulation**

TECHNICAL FEATURES

- TPE encapsulation of the glass.
- Includes a PP or PA division post.
- Fastens with a clip, rivet or screw.
- A black matte or glossy finish is applied to the outer division bar, which is snap-fit on the division post.

BENEFITS

- Lightweight
- Comfort
- Stylish
- Durability

Body Sealing Systems

ALL PRODUCTS FAMILIES

All Products Families for Automotive Body Sealing Systems

Glass Encapsulations

Our solutions can incorporate glass, gaskets and a division bar in a single part. In addition to being lightweight and easy to install, they guarantee a high level of acoustic insulation and a watertight seal.

Glass Seals

Our glass seals provide solutions for acoustic insulation, protection of the vehicle against water and dust and glass guidance. These lightweight and high-end parts can be completed with aluminum or stainless steel finishers.

Door, Trunk and Hood Seals

Our Door, Trunk and Hood Seals provide solutions for acoustic insulation, protection of the vehicle against water, air and dust and facilitate the door closing. They're light, recyclable and are available in a variety of finishes.
