

NUCLEAR ENGINE COOLING (NUCLEAR SUBMARINES)

Our Flexible Hoses and Connectors help power and cool nuclear submarine reactors. They feature fully integrated Hutchinson technology and their flexible design is suited to all customer needs.

TECHNICAL FEATURES

- Cooling liquid.
- Built according to Areva K15 specifications.
- Pressure resistant from 10 to 240 bars.
- Resists temperatures ranging from 5° to 120° C, and up to 200° C in the event of an accident.
- Fire resistant.
- A seven-year life cycle.

BENEFITS

- Durability
- Customizable
